Slovenia

June 25, 2007

Dear Sir,

Recently you have received a letter from the European Federation of Employee Share ownership (EFES), asking your attention for effective legislation in the area of employee share ownership.

Our Belgian Platform for Employee Share Ownership takes the liberty to express its support for this action. From our point of view, employee share ownership is an effective instrument in the framework of modern human resources policy.

According to substantive evaluative research it is positively associated with organizational commitment and may contribute to labour productivity and entrepreneurship.

This is why Belgium adopted dedicated legislations in 1999 and in 2001.

Our organisation will be delighted to cooperate with your Government or with national institutions in this field.

Yours faithfully,

Pierre Vanrijkel
President
